

CGU Workers Compensation

employer information modules

Free session to CGU policy holders

Session Overview

CGU Workers Compensation continuously strives to support and provide added value to our customers.

Building on feedback from our customers, CGU has developed a series of Employer Information Modules.

These modules would be of particular value if you are a manager of staff, currently in a position with OHS responsibilities and/or responsible for the management of workers' compensation claims. Each module has been designed to provide employers with an overview of the legislation, claims and injury management processes with the goal of achieving the best outcomes for all parties.

Claims Module Outline

- Welcome to CGU
- An overview of the legislation
- Claim lodgement and liability
- Calculating Weekly Wages
- Claims and Injury Management

These sessions are free for CGU Workers Compensation customers and can be hosted at the CGU premises in West Perth or at a mutually acceptable location as arranged in consultation with your CGU Case Manager.

If you would like to know more about any of the modules please contact your CGU Case Manager.
